PROFESSIONAL SUMMARY

I'm a Computer Science graduate who enjoys both creative and technical work. Through my experience in graphic design, social media content creation, virtual assistance, and business research, I've learned how much I enjoy turning ideas into something useful, whether that's creating visuals, organizing information, or helping a business with its daily tasks. I take pride in being dependable, paying attention to the little details, and finding ways to make my work better. I'm excited to bring what I've learned to a team where I can contribute, collaborate, and continue growing.
